

WHAT IS THE MC3300x MOBILE COMPUTER?

The ultimate versatile, lightweight-yet-rugged key-based touch computer

Introducing the next evolution of our highly successful MC3000 family of keypad/touch mobile computers, the MC3300x. With the MC3300x, you get more of everything you need to boost productivity to tackle the ever-increasing requirements of today's on-demand, e-commerce driven economy. Zebra's latest architecture with a powerful processor, a new standard range imager that captures barcodes faster, a more powerful triple shift battery, faster WiFi with improved Bluetooth BLE connectivity — all wrapped in a more rugged package.

WHY SHOULD YOU BUY THE MC3300x?

TOP 5 CUSTOMER BENEFITS

1

Zebra's most powerful Android architecture.

Speed up apps with more processing power. Get all the benefits of Android 10 — the most powerful version of Android yet. Deliver near instant application response times and unmatched roaming with dependably superior WiFi connectivity. Get unmatched value with Zebra Mobility DNA — a comprehensive ecosystem of tools that improve productivity, simplify management and app integration. And LifeGuard™ for Android™ provides security patches every day your devices are in service.

2

Proven fit-for-purpose ergonomics — now even more rugged

You get the unmatched ergonomics and flexibility of the MC3000 family — lightweight and ergonomically balanced for all day comfort; a choice of four form factors and three keyboard options. Now with higher rugged specifications, the MC3300x is more rugged and ready for all-day business with an increased 6 ft./1.8 m drop spec across the operating temperature range, triple the tumble spec (3,000 3.3 ft./1 m), and IP64 dustproof sealing.

3

More ways to capture more kinds of data.

Short, mid or long range 1D and 2D scanning — the SE4850 scan engine does it all. Workers can capture barcodes in hand and on your uppermost warehouse racks — as far as 70 ft./21.4 m away. The new SE4770 standard range scan engine offers intuitive illumination for point and shoot simplicity. An optional 13MP camera captures detailed photos. And Zebra's Multi-Barcode Scanning enables the capture of multiple barcodes with one press of the scan button.

4

Boost productivity with triple-shift battery power.

When you choose the MC3300x, you get a better battery. The new 7000 mAh extended capacity battery is standard with every MC3300x — and can power the MC3300x for up to three shifts. And that's not all. With hot swap support, workers can seamlessly change to a charged battery without a reboot. And you get a wealth of battery metrics to better manage your batteries — so you can have a smaller battery pool with fewer batteries to purchase and manage.

5

Keep using the MC3XXX accessories you have today.

Backward compatibility means you get the benefits of the latest platform while using most of your existing MC3200/MC3300 accessories, including soft holsters and select batteries. And you can use your existing MC3200 charging solutions by adding an adapter cup.

APPLICATIONS

Warehousing/Distribution

- Picking and putaway
- Shipping and receiving
- Cross-docking
- Inventory control
- Reverse logistics

Manufacturing

- Line-side replenishment
- Work in Process (WIP) material tracking
- Inventory put-away
- Quality control

Retail

- Price verification/updates
- Reverse logistics
- Store receiving

ROI

- Improved productivity
- Improved throughput
- Enhanced customer service
- Lower upgrade and migration costs
- Maximum return on investment with future-proof platform
