Navis Certification

What does Navis Certification mean:

- The Zebra Vehicle Computers VH10, VC80, and VC80x have successfully been certified by Navis.

- Navis is the market leader of Terminal Operating Software (TOS) which is used to manage intermodal sites like seaports or rail yards.

- The Zebra Vehicle Computers (VCs) are installed on vehicles used on these sites, such as straddle carriers, reach stacker or terminal tractors.

- Through the Zebra VCs, the vehicle operator is wireless connected to the Navis TOS and gets the container movement instructions in real time.

- By choosing a Navis certified device, intermodal site operators will reduce implementation risks as the functionality of the technology has been validated in advance.
